

Quorum™ ALARM EMITTER

YOUR PERSONAL PORTABLE ELERT®

The Quorum ELERT is a modern electronic motion detector that alerts you as soon as someone tampers with your belongings. There are practically no limits to its area of application. The ELERT is small, lightweight, and can be attached to almost any object in a variety of ways.

Your ELERT is your personal pocket-sized anti-theft device. By entering your previously saved, unique, three-digit code, you can disarm the device. Keys, which are famously easy to lose, are therefore eliminated. Other program functions include adjustable delay times of 3, 10, and 20 seconds.

To set the alarm, you only need to press two buttons. After a standard delay time of 10 seconds, the ELERT is armed. One minute later, the ELERT switches to energy-saving mode to conserve the batteries. Of course, this does not affect the alarm function.

In an emergency, you can also trigger the alarm spontaneously with the ELERT by pressing the two buttons at the bottom right at the same time. When the alarm is triggered, the ELERT emits a nerve-racking signal of at least 103 dB, alerting you and others that someone is tampering with your property. This also has a strong deterrent effect on potential thieves or intruders. And in the opinion of the police, a loud alarm is often the best protection against crime!

YOUR PERSONAL PORTABLE ALARM EMITTER

Versatile Protection

- Attach the ELERT to entrance doors, sliding doors, or windows vulnerable to break-ins.
- The ELERT watches over your luggage, wallet, or laptop computer while traveling.
- Attach the ELERT to valuable equipment at home or in the office.
- The ELERT also guards water skis and golf equipment.
- Protect your briefcase, camera, or sports bag.
