power source: 4 x AA batteries only
weight: 1300 g
dimensions: 70 x 160 x 210 mm \ 70 x 250 x 210 mm
tripod socket: 1/4"

made in Japan by Sankyo Seiki

- ***(1) Sankyo Hi-Focus System** is a superimposed image range finder. "When focusing the lens, press the Hi-Focus button. The viewfinder will automatically switch over to the double image focusing system wich has a magnification of 2x. Next, turn the distance ring until the double image merges into one image. After focusing, release the Hi-Focus button, then the field of view in the viewfinder will automatically return to the original one and you will be ready to start shooting" (manual).*
